- webAPI
- Jest
- Apollo Server
- Git

SUMMARY

Bringing skills in design, communication, collaboration, & creative problem solving to develop well-built, user-friendly applications. Seeking new tech frontiers and great team work.

PROJECTS & WORK EXPERIENCE

Full Stack Developer | January 2023 - present
The Child Welfare Portal | https://github.com/archonology/CW-Portal
Built to client's specifications. Responsible for wire-framing, back end conception and construction, front end, interactive and user-friendly UI, and connections to back end database. ReactJS, Mongo DB, Mongoose, GraphQL, Apollo Server, Material UI, and Bootstrap utilized.

Full Stack Developer | December 2022
Prima Materia | https://github.com/archonology/Prima-Materia
Envisioned UI and site framework; created API search functionality and assisted on back end and front end design components; implemented React-Spring animation for the homepage; assisted in MUI research and implementation, debugging, and refining finished application for functionality across screen sizes. ReactJS, Mongoose, MongoDB, GraphQL, ApolloServer, Material UI, and React-Spring utilized.

Family Services Case Manager | June 2017- July 2022
Cook County Public Health and Human Services
Utilized communication, critical thinking, and management skills to respond to child maltreatment reports. Led investigations, case plans, and court cases. Interfaced and collaborated across systems to monitor, support, and ensure the success for families and children. Orchestrated and developed agency procedures with tribes, attorneys, and a multi-disciplinary team that led to a 95% decrease in out of home placements.

EDUCATION

Full Stack Web Development Certificate | June 2022 - Dec 2022
University of Minnesota
BFA | Aug 2004 - May 2008
University of Minnesota, Morris

INVOLVEMENT

Currently offering consulting and coding support for "The Lift Garage" in Minneapolis; member of JavaScriptMN on MeetUp.com.
